

"Through-the-floor" HIGH-SPEED DISPERSERS

Pictured: 800-75 HP single speed, two-station, "through-the-floor" high-speed disperser with a 60" air over oil hydraulic lift.

INCREASES BATCH SIZE

CONVENIENT LOADING LEVEL

SAVES FLOOR SPACE

REQUIRES LESS CEILING HEIGHT

Myers "through-the-floor". Up to 4 positions. Installations are up to 300 HP in variable speed models. This type of installation permits handling of larger batches than possible with floor models.

- ❑ Finished batches can be gravity discharged to holding tanks or canning equipment on the floor below.
- ❑ Installing tanks in the floor holds heights to the most convenient loading level.
- ❑ Through-the-Floor installations available for most hoist-mounted mixers/dispersers.

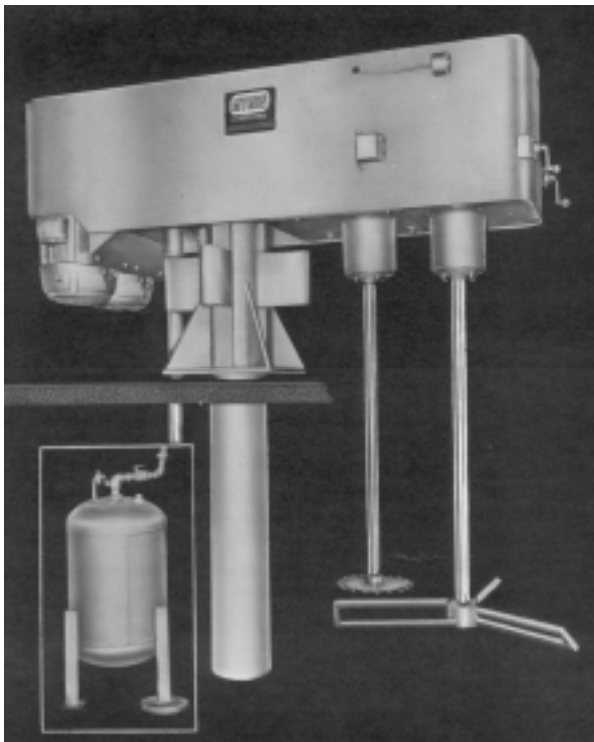

Engineering, Inc.

The first name in mixers and dispersers
