

## Ram It and Weigh It Electronically!

### MOVE TANK INTO THE RAM

No obstruction to push the tub over. Tub has extra heavy reinforcing bars to withstand tremendous pressure.

1. Heavy Duty 3 or 4 shaft Myers disperser processes high viscosity products.
2. Hydraulic ram discharges the heavy material.
3. Programmable electronic scale fills containers to exactly the right weight.

### LIGHTED DIGITAL ELECTRONIC CONTROLS

1. Press the tare weight of the container.
2. Then press the net weight you want - memory retains this weight.
3. Press over or under allowance acceptable.
4. Press a pedal and the desired weight will be discharged.
5. Gross weight will show for figuring shipping.
6. Quickly change settings for different size or weight of container.
